

## CMMI MATURITY L2 AND MATURITY L3 CAPABILITY MATURITY MODEL INTEGRATION

CMMI is a proven set of global best practices that address key capabilities and common business challenges in quality, engineering, business planning and resilience, management of the workforce, and more. It is a process level improvement, training and appraisal program.

**Capability Maturity Model Integration** (CMMI) helps organizations understand their current level of capability and performance in the context of their own business objectives compared to best practice industry benchmarks.

Your organization can be appraised at five different maturity levels for processes: initial, managed, defined, quantitatively managed and optimizing. The most common levels we see are CMMI Maturity Level 2 or Maturity Level 3 for development/service.

### CMMI BENEFITS

- Improved business performance
- Leverage best practices
- Build Agile resiliency and scale
- Performance-oriented appraisal method improves reliability
- Improved customer satisfaction
- Increased employee engagement
- Improved bottom line

### CMMI APPRAISAL

A CMMI appraisal is an activity that identifies the strengths and weaknesses of your business processes and how they related to CMMI best practices. A Lead Appraiser conducts your appraisal once Core Business Solutions assists in you being prepared.

You can pursue Maturity Level 2 or Maturity Level 3. Our program includes 2 levels of appraisals - an Evaluation Appraisal and a Benchmark Appraisal.

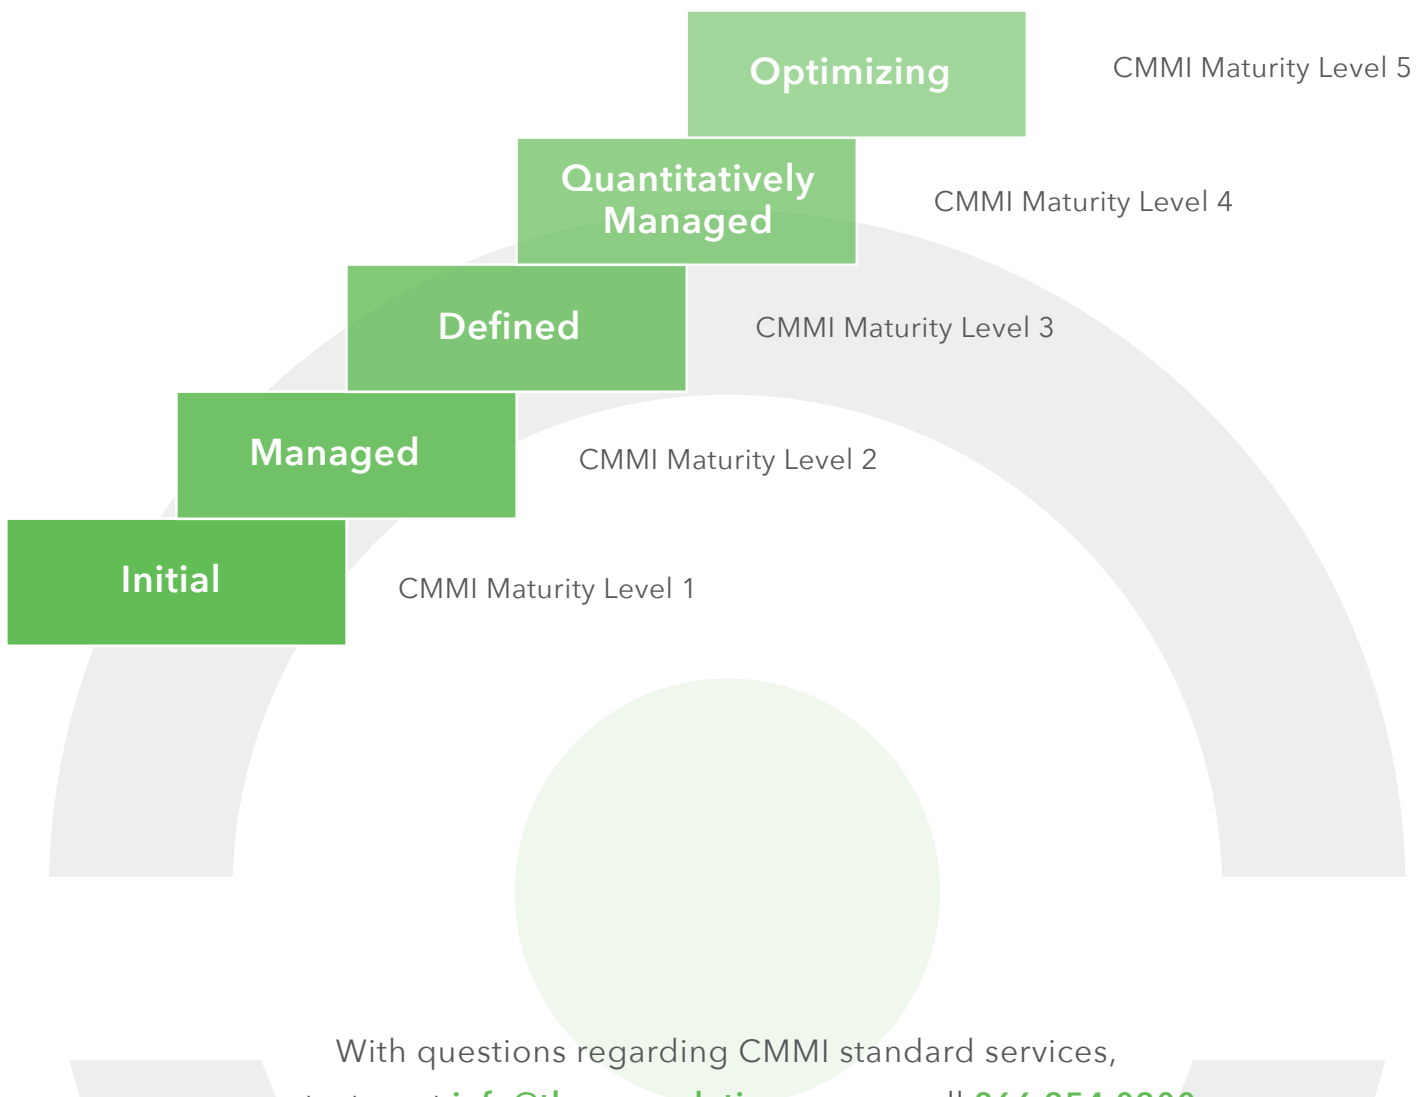

## CONSULTING SUPPORT FOR CMMI COMPLIANCE

Core Business Solutions has qualified CMMI consultants ready to help you achieve CMMI Maturity Level 2 or CMMI Maturity Level 3. We also provide consulting support for companies seeking multiple standards (such as ISO 9001 and ISO 27001) through an Integrated Management System.

Our consultants translate the technical language of CMMI into Plain English and make it as simple and effective for your organization as possible.
