CMMC LEVEL 1 GUIDED
SELF-ATTESTATION PROGRAM

PROTECT FCI. MEET YOUR DOD REQUIREMENTS. SELF-ATTEST WITH CONFIDENCE.

If your small or midsize business is part of the **Defense Industrial Base (DIB)** and handles **Federal Contract Information (FCI)**, CMMC Level 1 may be a requirement for doing business with the Department of Defense.

But figuring out where to begin—and knowing whether you have everything in place to self-attest—can be challenging.

Core Business Solutions makes the process manageable. Our CMMC Level 1 Guided Self-Attestation Program pairs your organization with an experienced consultant who guides you from initial scoping through assessment, evidence review, SPRS readiness, and self-attestation.

3 SIMPLE STEPS TO CMMC LEVEL 1 SELF-ATTESTATION

STEP 1: UNDERSTAND & PREPARE

Know what applies and what you need to protect.

Your Core consultant helps you understand CMMC Level 1 requirements and establish a practical starting point for compliance. Together, we'll review contract applicability, confirm your CMMC Level 1 scope, identify how FCI moves through your organization, and prepare your team for the assessment.

You'll gain: a clear understanding of your scope, responsibilities, FCI environment, and what will be evaluated.

STEP 2: ASSESS & CLOSE THE GAPS

Determine where you stand and what needs to be fixed.

We guide your organization through the Level 1 safeguards and assessment objectives, review the evidence supporting your implementation, and document the results. If gaps are identified, we'll help you understand what needs to be corrected and what evidence should demonstrate that the requirement is fully implemented.

Your program includes an **Assessment Workbook covering the 15 safeguards and 59 objectives**, along with a documentation toolkit to support implementation.

You'll gain: a documented assessment, organized evidence, identified gaps, and a practical path to readiness.

STEP 3: SELF-ATTEST & MAINTAIN

Complete the process with confidence.

Once the requirements are satisfied, your consultant helps prepare your organization for management closeout and SPRS submission. We guide you through the submission process and help prepare your Affirming Official for the organization's self-attestation.

Your organization remains responsible for implementing the controls and making the final self-assessment conclusion, and your company's Affirming Official provides the required sign-off.

You'll gain: an organized path to completing your CMMC Level 1 self-attestation fast—and a foundation for maintaining compliance going forward.

EVERYTHING YOU NEED TO NAVIGATE CMMC LEVEL 1 COMPLIANCE

The program includes a **Customer Onboarding Guide**, **Training**, **CMMC Level 1 Assessment Workbook**, **Documentation Toolkit**, and **SPRS Submission Toolkit**, with an optional annual compliance and maintenance program available.

Consultant-Guided. Small-Business Friendly.

You don't need a full-time cybersecurity compliance team to approach CMMC Level 1 in an organized way.

Core Business Solutions helps small and midsize defense contractors turn CMMC requirements into practical actions. **We guide the process, help organize the evidence, identify gaps, and prepare your team for self-attestation—while your organization maintains ownership of its systems, controls, assessment, and affirmation.**

READY TO SIMPLIFY CMMC LEVEL 1?

Three steps. Expert guidance. A clear path to self-attestation.
